

MRI are a genre breaking band from Liverpool with elements of Psych, Metal and Punk embedded in their sound.

The Three piece was formed by Ben Coyle (drums) and Richie Yates (guitar) who quickly found Dave Parker (bass) to complete the lineup. All sing (or shout)!

Musically they have a wide variety of influences and this allows the band to create unusual songs that step outside of strict genre definitions whilst maintaining their overall style as a guitar band.

The name taken from the medical equipment Magnetic Resonance Imager due to a fascination with the sounds that emanated from the equipment during sessions.

They have played gigs around the North West of the country and supported luminaries such as Blitzkrieg, CUT, Bones Shake and 2 Sick Monkeys.

With several singles released the band are currently working on an album release.
